

Indian Institute of Information Technology Vadodara

Patel Krishiv Anilkumar

Education

Indian Institute of Information Technology Vadodara

B.Tech in Computer Science and Engineering **CPI: 7.4**

Aug 2024 – May 2028

Diu, India

Indian Institute Technology Madras

B.S. in Data Science and Application **CPI: 6.64**

Aug 2024 – Present

Madras, Gujarat, India

Bhulka Vihar School

Class XII (Higher Secondary) – Gujarat Board **Percentage: 87%**

Apr 2024 – Mar 2024

Surat, Gujarat

Bhulka Vihar School

Class X (Secondary) – Gujarat Board **Percentage: 96.17%**

Apr 2022 – Mar 2022

Surat, Gujarat

Experience

National Institute of Technology Calicut

Summer Intern

May 2026 – July 2026

Internship, Calicut, Kerala

- Developed a **STGCN** for traffic flow prediction using real-time traffic and weather data.
- Modeled road networks as graphs and applied **Graph Neural Networks (GNNs)** to capture spatial and temporal dependencies in traffic patterns.
- Built end-to-end ML pipelines including **data preprocessing, feature engineering, model training, and evaluation.**
- Integrated external features such as **weather data** (temperature, visibility, wind speed) to improve prediction robustness.
- Utilized **PyTorch, Pandas, and NumPy** for efficient model development and experimentation.

Projects

GPS Spoofing and Drone Path Manipulation | *Python, MATLAB, Signal Processing, GPS, GNSS*

- Conducted research on **GPS spoofing attacks** and their impact on autonomous drone navigation.
- Simulated spoofing scenarios to analyze **deviations in drone flight paths** under malicious GPS signals.
- Studied **GNSS spoofing vulnerabilities** and documented potential countermeasures against GPS spoofing attacks.

Warehouse Management System | *React.js, Node.js, Express.js, MySQL* | GitHub

- Built a full-stack **inventory and order management system** to track stock levels and warehouse operations.
- Designed **RESTful APIs** and optimized database schema for efficient data handling.
- Implemented seamless frontend-backend integration using **React and Express.**

Achievements

- Solved **200+** algorithmic problems on **LeetCode** and **135+** on **GeeksforGeeks** across data structures, algorithms, and dynamic programming.
- Completed foundational level in Programming and Data Science from IIT Madras.
- Pursuing IIT Madras BS in Data Science alongside B.Tech CSE.

Technical Skills

- Languages:** C++, Java, Python, SQL
- Core CS:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks
- Frameworks & Libraries:** Flutter, React, Spring Boot, PyTorch, Scikit-Learn, Deep Learning, Graph Neural Networks, STGCN, NumPy, Pandas
- Tools & Technologies:** Firebase, Git, GitHub, Docker, VS Code, Android Studio, MySQL, Linux, MATLAB

Managerial Role

Table Tennis Club

Core Member

August 2024 – May 2024

IITV-ICD, Diu

- Conduct Events for Table Tennis Club in the Sports Fest Olympus
